Remarks: With SEO approval, Johnson County personnel began a maintenance release of 100 cfs on June 4th from the north dam, continuing through the end of the month; the purpose was to lower the reservoir level to minimize the potential for damage to the south dam riprap from wave action. While ignoring seepage and evaporation losses, the reservoir remarkably gained almost 3,000 acre-ft from natural runoff and rain in June. As all of the Piney/Rock/Shell Creek rights had previously filled, these extra inflows were attributed to permits, 7289R and 7290R.
